

## BESTE Selectable Perforators

### Product Description/ Functionality:

The **BESTE Dual Selectable Perforator** and the **BESTE Quad Selectable Perforator** run in-line with continuous output printers, and have the ability to add cross perforation, at a preset point, to any page within the print run. The **DSP** and the **QSP** run in-line after a printer and before a trimmer/cutter/stacker, folder/stacker, job separator, or rewind. These units aid in the migration from cut sheet printers.

### Product Advantages:

- Selectively adds remittance tear-off perforations to a one-up or two-up Web, with the perforation for each stream independent from the other.
- Aids in the migration from cut sheet printers, by allowing continuous forms printers to customize individual pages within the print run.
- DSP adds up to one tear-off perf per page. QSP adds up to two tear-off perfs per page.
- Cross perf blades are available in many styles, including standard sizes and "micro clam perf". A type one interface and mark reader are used.
- Accepts standard, heavy and many lightweight papers.
- Direct interface capability, mounted on wheels for mobility.
- Fixed Size Unit in your choice of size gives near perfect perforations.

**Product Specification:**

**Model 4201 - DSP Dual Select-A-Perf**

<u>Dimensions</u>	<u>Weight</u>	<u>Electrical</u>
Height 44"	1,400 lbs	208/230/240 VAC
Width 42"		
Length 48"		

Pinfed

Maximum Form Width 18"  
 Minimum Form Width 6"  
 Perforation Repeat - Fixed Size by customer request

Speed: Compatible with all Pinfed Printers

**Model 4201 - QSP Dual Select-A-Perf**

<u>Dimensions</u>	<u>Weight</u>	<u>Electrical</u>
Height 44"	2,100 lbs	208/230/240 VAC
