

## BESTE 128-FO Folder

### Product Advantages:

- Patented, easy changeover from different form sizes. Significantly reduces set-up time.
- Accepts both standard and lightweight paper.
- Optional forms carts fill from folder, roll away, and feed inserters.
- Auto stop feature available to sense and alert operator to pending stop due to full output table.
- Direct interface capability and wheel mounted.
- Accepts roll or box input.
- U.L. Listed, Manufactured in the U.S.A.

Optional Forms Cart

**Product Specification:**

Dimensions	Weight	Electrical
Height 56"	1000 lbs.	
Width 48"	(approx.)	230 V/1 Ph
Length 8'		

**Product Maintenance**

Printer Vendors. Training available for self-maintenance.

**Question: WHY IS THE BESTE BUNCH FOLDER THE BEST FOLDER AVAILABLE IN THE WORLD TODAY?**

**Answer: TIME...AND PATENTS.**

Time, because size changes (both form width and form length) can be accomplished in minutes.

Patents, because these innovations, which can cut the time for size changes by as much as 80%, are so revolutionary they were awarded Patents allowing us their exclusive use.

Most Roll Feed suppliers use Spiral Folders. Paper width and form length changes require the operator to make several adjustments using hand-held or attached tools. The operator must change a gear, change the chute swing, and then to change the width they must move the "spiral assembly", move several "paper stops" and then manually move up to six paper beaters individually. This means they must loosen up to 18 bolts, screws, or nuts and then move each of up to 18 stops, beaters, and spiral assemblies into the proper position. Field observations show that form size change-overs can take up to thirty (30) minutes to accomplish.

The BESTE Bunch Folder also is a Spiral Folder. However, the "gear change" is accomplished by a "push/pull" arrangement. And, the chute swing is changed by a "push-pin" arrangement which requires **no tools**. But the best thing about a BESTE Bunch Folder is the way we handle moving all those "spiral assemblies" and "stops" and "beaters"....we turn one knob...by hand...in as little as **5 seconds**.
