

BESTE TWO-WHEEL DOLLY CART SYSTEM

Getting the fanfolded paper from the printer to the mailroom historically has been a problem. Carrying stacks of forms puts operators' backs in jeopardy, and most carts aren't necessarily easy to maneuver.

The **BESTE Two-Wheel Dolly Cart System** attaches to virtually any auxiliary folder/stacker, fills with up to 8,000 one-wide or 16,000 two-wide forms, tilts, and rolls easily away to the mailroom where it feeds the "first in" form directly into mailroom equipment.

Product Advantages:

- ▶ Forms feed directly into the cart from the Folder. In the mailroom, the "first in" form feeds directly out of the cart into inserting equipment
- ▶ Two-Wheel Dolly Carts take up significantly less space than traditional roll away carts
- ▶ Two-Wheel Dolly Carts are less expensive than traditional roll away carts
- ▶ Documents can be available to take to the mailroom within an hour of commencing print run
- ▶ No maintenance required
- ▶ Extremely portable and easy to operate
- ▶ Made in the U.S.A.
